

## **Four Sites Select TraumaCad for Filmless Orthopedic Planning Orthocrat Provides Seamless Integration with a Range of Software Platforms**

Four hospitals and clinics have recently chosen Orthocrat's TraumaCad orthopedic planning and templating solution to provide advanced orthopedic surgical planning and templating. The sites selected TraumaCad for its leading edge features, server-centric Web-based architecture and ability to integrate seamlessly with their PACS or orthopedic image management solutions.

The new TraumaCad sites include:

- Alabama Sports Medicine and Orthopaedics, AL
- Cox Health, MO
- Dartmouth Hitchcock, NH
- Orthopedic Associates, LLC, CO

"Today, more and more orthopedists want to enjoy the benefits of full digital workflow," said Zeev Glzman, Orthocrat CEO and founder. "Seamless integration of an orthopedic planning solution into image management software is crucial. TraumaCad was selected by these prestigious installations because it meets this goal and offers a full complement of advanced features."

TraumaCad provided these facilities with a comprehensive, cost-effective fully digital orthopedic solution. Through precise manipulation of soft-copy images and application of fixation and prosthetic systems, TraumaCad streamlines interventions, enhances outcomes and cuts costs. It also includes advanced modular deformity correction and pediatric packages.

### **About TraumaCad/Orthocrat**

Feature-rich, user-friendly and Web-based, TraumaCad is the industry's leading digital orthopedic surgical planning and templating solution. Realizing a host of advantages over competing solutions, TraumaCad is a thin-client, DICOM application that integrates with any PACS and network architecture, while delivering a consistent orthopedic work environment over a Web-enabled PC. While distinguished by its standards-based architecture, it also is a highly effective stand-alone orthopedic solution.

Orthopedic surgeons at prestigious U.S. institutions have chosen Trauma-Cad for its industry-leading benefits. The advanced software solution also been selected by a range of well-known medical equipment manufacturers for integration into PACS solutions to enable state-of-the-art digital orthopedic functionality.

TraumaCad was developed by a team of highly experienced clinicians who recognized a gap in the marketplace and were committed to filling it with a comprehensive, thoughtfully designed digital solution for orthopedic surgeons that they themselves would use. With offices in the U.S. and Israel, Orthocrat was formed in 2003 to market TraumaCad worldwide and maintain the company's strong commitment to research, development and quality that today has become its hallmark.
