Orthocrat Signs Agreements with 9 PACS Vendors

TraumaCad to Enable Preoperative Orthopedic Planning in Major PACS Solutions

November 28, Chicago, IL--Orthocrat, Ltd. (Tel Aviv) announces agreements with nine major PACS vendors for integration of its TraumaCad digital orthopedic planning solution into their advanced radiology solutions to enable full-featured orthopedic functionality.

Agreements have been signed with:

- Web MD
- Orex
- UltraRad Corporation
- Intelerad
- Viztek
- Icrco
- Vepro USA
- MTS
- Dynamic Imaging

TraumaCad provides surgeons with digital images, tools and templates for planning a full range of orthopedic surgeries, offering an easier and more accurate alternative to traditional preoperative planning using hard copy film and overlays. Seamlessly integrating with any PACS, TraumaCad displays images from a full range of modalities. It enables preoperative plans to be archived with patient files and viewed in the operating room.

With a complete library of implants and fixation element templates from most leading manufacturers, TraumaCad streamlines comparison of templates to digital patient images to enable selection of the best surgical option. TraumaCad automatically displays implants to scale with patient anatomical images. Using a simple wizard-like process, surgeons are guided through all pre-surgical planning steps. Using the advanced software, surgeons can enter the operating room equipped with the specific tools, instruments and implants they need, shortening procedure time.

Scaleable and Web-based, TraumaCad turns any PC into a full-featured diagnostic workstation, delivering affordable enterprise-wide access to images and surgical plans. It is compatible with CR, DR, CT, MRI modalities. Among the supported implant manufacturers are Biomet, Depuy, Smith and Nephew, Stryker, Wright and Zimmer.

About Orthocrat

Orthocrat was established in early 2003 by a team of experienced surgeons, with the goal of developing practical computer assisted surgical techniques. TraumaCad was Orthocrat's first introduction in a growing product line and enables pre-surgical planning of trauma, arthroplasty and osteotomy procedures. Orthocrat products are equally suited for small- to medium-size practices as well as for larger academic institutions. Orthocrat is located at Bar Kochva 34, 63427 Tel Aviv, and may be reached by calling 972-3-6297138 or 1-877-211-1804 in the U.S. Visit their website at www.ortho-cad.com.
