

HCS PACS Release

For Immediate Release

April 24, 2006

Health Care Systems, Inc. (HCS) Announces Partnership with OrthoCrat, LTD

HCS to offer an integrated digital orthopedic surgical

planning and templating solution, TraumaCad, within HCS PACS

Montgomery, Alabama – April 24, 2006 – Health Care Systems, Inc. headquartered in Montgomery, Alabama, known for solutions which meet customers' growing needs through innovative functionality, has selected Orthocrat to provide HCS PACS clients a solution to easily and exactly manipulate images from HCS PACS and virtually prepare for fixation and prosthetic solutions prior to any invasive technique.

HCS PACS, offered by HCS since late 2004, is currently deployed in facilities in Alabama, Georgia, Kentucky, Mississippi, New Jersey, Pennsylvania, Tennessee, and Texas. HCS PACS serves facilities such as critical access hospitals, LTACs, community hospitals, and multi-facility integrated healthcare delivery networks. The addition of TraumaCad to the HCS PACS offering will add the following functionality:

- Digital pre-operative planning for a complete range of orthopedic surgeries
- Comprehensive Library of surgical implant templates
- Advanced modular deformity correction
- Reconstruction of fractures
- Pediatric package
- Archived surgical plans
- Automatic updates to template library and software version

"HCS is committed to providing our clients with solutions that positively affect their facilities in ways that extend much farther than the bottom line. Offering TraumaCad as part of our HCS PACS solution brings great benefits to the physicians and patients each of our facilities serves." said HCS President and CEO, Dwight Henderson.

"TraumaCad provides a payback that broadens the scope of PACS to serve the entire hospital, not just radiology. We are excited to announce our partnership with OrthoCrat, an unquestioned leader in digital orthopedic technology."

ABOUT ORTHOCRAT

Feature-rich, user-friendly and web-based, TraumaCad is the industry's leading digital orthopedic surgical planning and templating solution. It streamlines interventions, enhances outcomes and cuts costs by enabling advanced orthopedic surgical planning through precise manipulation of soft-copy images and application of fixation and prosthetic systems. TraumaCad also includes advanced modular deformity correction and pediatric packages.

TraumaCad was developed by a team of highly experienced clinicians who recognized a gap in the marketplace and were committed to filling it with a comprehensive, thoughtfully designed, digital solution for orthopedic surgeons that they themselves would use. With offices in the U.S. and Israel, Orthocrat was formed in 2003 to market TraumaCad worldwide and maintain the company's strong commitment to research, development and quality that today has become its hallmark.
