

iCRco Signs With Orthocrat to Distribute TraumaCad Preoperative Planning Software.

Torrance , CA—Monday, August 30, 2004— iCRco, a Computed Radiography manufacturer and software solution provider from Torrance CA, has signed an agreement to distribute TraumaCad Preoperative Planning software from Orthocrat.

iCRco produces digital X-ray solutions, for orthopedic surgeons, the TraumaCad and iCRco software packages interact seamlessly and provide a complete, affordable solution to orthopedic practices. Many Orthopaedic, that see a need to go filmless and retain ability to perform preoperative planning. Built-in Ortho tools and a complete template library including screws, nails, plates, and prosthesis devices assist in preplanning. In addition, the software package offers procedure simulation capabilities for fracture reduction, osteotomy, and trauma.

"iCRco is a leader in the new generation of CR technology, and we are excited to be able to include iCRco, as a partner in our strategy to offer an comprehensive, affordable Orthopaedic planning package to the market", said Zeev Glozman CEO and one of the founders of Orthocrat Ltd.

About Orthocrat

Orthocrat was established in early 2003, by a team of experienced surgeons, with the target of developing practical computer assisted surgical techniques. TraumaCad, is the first one of the line of products from the company allowing pre-surgical planning of Trauma, Arthroplasty and Osteotomy procedures. Orthocrat products are equally suited for small-medium size practice as well as for larger academic institutions.
